SKILLS

C++	C	Python	HTML	JavaScript	CSS

Tailwind CSS	Bootstrap 5	Node.js	Express.js

Mongoose ODM	MongoDB	Financial Accounting

DSA	Git/Github

ACHIEVEMENTS

🎓 **Attained NPTEL Elite Rank in C Language on behalf of IIT Kharagpur**

Achieved NPTEL Elite Rank in C Language from IIT Kharagpur, securing an overall 70% in the certification test after completing a 12-week course.

⭐ **Academic Excellence**

Achieved a remarkable CGPA of 9.2, reflecting consistent academic excellence and dedication to learning.

⛳ **Leadership Role - Head Boy**

Served as Head Boy, demonstrating exceptional leadership and organizational skills, fostering a positive school environment.

STRENGTHS

🚩 **Technical Skills**

Proficient in C, C++, Python and Web Development and excited to learn new technologies and best practices.

🪄 **Communication Skills**

Clearly conveys ideas and information, fostering open communication within the team

🏅 **Entrepreneurial Spirit**

Proactively identify opportunities, embrace innovation, and drive results with a forward-thinking mindset.

🚅 **Fast Learner**

Fast learner with a proven track record, capable of rapidly acquiring new skills and adapting to diverse challenges

👥 **Team Player**

Collaborative team player with strong interpersonal skills, fostering a positive and productive work environment.

⚙ **Problem Solver**

Proven ability to analyze complex situations and develop effective solutions.

🗂 **Leadership Skills**

Exhibits leadership qualities, whether leading a team or taking charge of individual responsibilities

🔋 **Discipline**

Exemplify discipline, ensuring consistent and reliable performance in achieving goals and meeting deadlines

PROJECTS

User Authentication Project

🔗 https://github.com/SrisailamKakurala/c-and-cpp-projects.git

File-Based Login System

- Implemented a C++ login system with user registration and password recovery features, leveraging file I/O for user data storage. Demonstrated proficiency in system interactions and data manipulation.

C++ Airline Reservation Project

🔗 https://github.com/SrisailamKakurala/c-and-cpp-projects.git

C++ airline reservation system with customer details and ticket generation.

- Implemented an airline reservation system in C++ with customer details, flight registration, and ticket generation functionalities. Utilized file handling for data storage and user-friendly interfaces for an intuitive experience.

Student Marks Memo Management System

🔗 https://github.com/SrisailamKakurala/c-and-cpp-projects.git

Efficient C++ program managing student marks, offering input, display, and search features with percentage and grade calculations.

- Developed a C++ program for managing student marks, including input, display, and search functionalities. Utilized classes for organized data handling and implemented percentage and grade calculations.

CMD Chat Bot in C

🔗 https://github.com/SrisailamKakurala/c-and-cpp-projects.git

A simple command-line chat bot in C offering basic functionalities like opening programs, providing time, and answering common queries.

- A C program implementing a command-line chat bot with various commands for tasks such as opening programs, checking the time, and responding to user queries.

Simple Banking System in C++

🔗 https://github.com/SrisailamKakurala/c-and-cpp-projects.git

This C++ program represents a simple banking system enabling users to deposit, withdraw, and view their account balance interactively.

- A basic banking project in C++ allowing users to deposit, withdraw, and check their account balance.

Bubble Game
